

# GUT BALANCE PROBIOTIC

Embark on a journey to wellbeing with Natural Animal Solutions' **Gut Balance Probiotic** – because good health starts with the gut

- Promote proper digestion and nutrient absorption
- Strengthen immunity naturally
- Restore balance in gut flora due to stress and dietary changes

## Features and benefits

### Optimal blend of 5 probiotic strains

Featuring L Rhamnosus, L Paracasei, L Plantarum, B Lactis, and B Longum, our Gut Balance Probiotic offers health benefits that **boost the immune response, benefiting skin, joints, digestion, and dental health**. The inclusion of B Longum has also been found to support healthy signals to the brain, **effectively reducing the onset of anxiety**.

### High concentration of 4 billion CFU within each gram

Boasting ample excess, our Gut Balance Probiotic provides an abundance of live probiotics to deliver maximum effectiveness, **bolstering your pet's immune system** and maintaining a robust gut environment.

### Three flavour options

Our Gut Balance Probiotic provides fantastic flavour options, including **Natural, Kangaroo or New Zealand Green Lipped Mussel**, catering to even the fussiest eaters.

### Prebiotic support from Chicory Root derived Inulin & Barley Malt Extract

Harnessing the power of **Chicory Root derived Inulin and Barley Malt Extract**, our Gut Balance Probiotic product **delivers targeted prebiotic support**, promoting a balanced gut microbiome.

### Immunomodulatory support with Astragalus Polysaccharides

With an **optimal ratio of Astragalus Polysaccharides**, our Gut Balance Probiotic supports your beloved animal's immunomodulatory system, **enhancing their overall immune response**.

### Controlled manufacturing environment

Manufactured and stored in a **temperature and humidity controlled environment**, our Gut Balance Probiotic ensures **consistent quality and potency**, providing a reliable, long-lasting solution for your pet's gut health.

### Ingredients

- Lactobacillus Rhamnosus
- Lactobacillus Paracasei
- Bifidobacterium Lactis
- Lactobacillus Plantarum
- Bifidobacterium Longum
- Inulin (Chicory Root)
- Barley Malt Extract
- Astragalus Polysaccharides
- Excipients: Maltodextrin, Pyrogenic Silica

**Flavour variants:** Natural (Malt), NZ Green Lipped Mussel or Kangaroo.

### Directions and dosages

Mix with your pets food and always provide clean, fresh drinking water. After opening, store in refrigerator and use within 60 days. 1 scoop = 1.3 grams.

#### Cats & toy dogs: 1-10kg

1 scoop daily

#### Small dogs: 11-26kg

2 scoops daily

#### Medium dogs: 27-44kg

2.5 scoops daily

#### Large dogs: 45kg+

3 scoops daily

### Packaging options

- Gut Balance Probiotic 80g, 150g – Natural
- Gut Balance Probiotic 80g, 150g – NZ Mussel
- Gut Balance Probiotic 80g, 150g – Kangaroo

**Disclaimer:** NAS products are crafted with care, but for pets with allergies, sensitivities, or medications, we advise consulting your vet and starting with minimal servings to monitor reactions. NAS0029

# Gut Balance Probiotics – restoring gut health during the holiday season.

As the holiday season approaches, our pets often revel in the festivities, enjoying the occasional indulgence in leftover treats or beach debris.

Amidst these moments of joy and exploration, the significance of maintaining our pets' gut health becomes paramount, with probiotics and prebiotics playing pivotal roles in their well-being.

## The role of probiotics and prebiotics

The gut powers 70% of the immune system and controls the absorption of nutrients from the diet. Whatever you feed your pet, that food is only as valuable as the extent to which your pet can metabolise those wonderful vitamins and minerals.

**Probiotics** are **beneficial live bacteria** and yeasts that promote a healthy gut flora. Introducing these beneficial microbes through supplements or specific foods can aid in restoring balance to the gut microbiome, especially after instances of dietary indiscretion or exposure to potentially harmful substances. Probiotics work to repopulate the gut with beneficial bacteria, aiding in the breakdown of food, enhancing nutrient absorption, and bolstering the immune system.

**Prebiotics** serve as the fuel for these beneficial bacteria. They are non-digestible fibres that nourish and support the growth of good bacteria in the gut.

## Features and benefits

- 20BN CFU per serve
- 3 flavoured powders – Natural, Roo and NZ Green Lipped Mussel
- 5 carefully selected strains
- Temperature controlled manufacturing process to ensure viability
- Rich in prebiotic, insoluble and soluble fibre – Chicory Root & Astragalus Root
- Incredible value for money – 150gm providing 100 serves for a medium dog
- Suitable for cats and dogs

By including these beneficial elements into their diet and being vigilant about potential hazards, pet owners can ensure their furry companions navigate the holiday season with digestive

resilience, vitality and a healthy gut. Let's cherish the holiday festivities while safeguarding our pets' well-being by nurturing their gut health and providing them with the care they deserve.
