

Progress Update

Permits approved, footings poured and production facility rebuild underway. We would like to advise that, at this stage, our Naval Base production facility rebuild is progressing according to the builders schedule. We are still due to start producing **Cherish Pet Food** in **late June of this year** and will provide further updates as they occur.

We apologise for any inconvenience caused and the lengthy delay. We look forward to having **Cherish Pet Food** available as soon as possible.

**We take care of the science, so you can
Cherish more moments together.**
