Taste matters

Great taste is not only important to cats but also their pet parents, who can be assured that ADVANCE™ new recipes keep their cat happy and healthy. With the new improved ADVANCE™ Dry Cat formulas, whichever way a cat enjoys their dry food, they'll have a nourishing meal that's also delicious.

**NEW
& IMPROVED
RECIPES**

Delivering on taste & supporting cat wellbeing through science

Key reasons for you to recommend the new and improved ADVANCE™ Dry Cat food range to your customers, clients and pet parents include:

1. Irresistible taste guaranteed – or their money back

We've challenged everything we know to redesign the new ADVANCE™ Dry Cat food formulations.

We're sure that our improved recipes will tempt even the most discerning feline, and our 100% money back guarantee means a no-risk purchase.

2. Fuelled by science and customised for cat wellbeing

Our evidence-based recipes are backed by global science from the Waltham Petcare Science Institute and tailored to cat needs.

ADVANCE™ pet food is scientifically formulated to nourish and protect a cat, no matter what life throws at them.

3. Purposeful ingredients sourced for quality

ADVANCE™ recipes use proteins sourced locally from the best suppliers in Australia, ensuring high quality from local sources. Our suppliers are regularly audited to ensure the highest level of quality and safety. To deliver the best taste possible, we've overhauled our recipes to deliver stronger science in a new and improved recipe with taste we know cats will love.

Carbohydrates form the structure of the kibble and are nutrient dense and a natural source of vitamins, minerals and fatty acids. We've changed our carbohydrate base to deliver more protein from meat sources, invested in our factories to enhance the digestibility of ingredients, with flavours cats will find irresistible.

4. Made in our state-of-the-art facilities on the Central Tablelands of NSW.

Our dry facility is one of the most state-of-the-art factories in the Mars Pet Nutrition Global network and is equipped with the highest quality and food safety standards to help support a more sustainable approach to Australian pet food manufacturing.

ADVANCE™ pet food is made in full compliance with the AS5812; Australian Standard for the Manufacturing and Marketing of Pet Food - Cats and Dogs. As well as being certified to FSSC 22000. This provides pet parents with the confidence that ADVANCE™ pet food is manufactured to the highest level of pet food safety standards.

ADVANCE™ pet food carries the PFIAA Tick of Approval.
