

PAW (Pure Animal Wellbeing) EAN Updates – Monthly Update

June, 2026.

Dear Valued Customer,

We are writing to keep you updated about our previous update regarding our product information and identification. As we progress through the transition process, we will be updating the barcodes on the products within our range.

What is changing?

Starting from late March, our existing product and shipper barcodes will be replaced with new EAN codes aligned with the new PAW Pet Supplement International business entity. While product formulations, pack sizes and pricing remain unchanged, the barcode printed on the packaging and on product shippers will be updated.

Why are we making this change?

This update is a necessary step in our aligning our product identification and supply chain systems with the new entity. It ensures:

- A consistent product identification framework across the business
- Ongoing compliance with global data and barcode standards

What do you need to do?

We ask that you extend your support by updating your internal systems, databases and automated processes to reflect the new barcode data. A detailed SKU list with corresponding code detail is provided within this communications.

We're here to help.

We will endeavour to provide as accurate timelines as possible, however as demand ebbs and flows, some of the timings provided may shift forward or later in the year. Our intention to have this project completed and all old barcodes phased out within the next 12-18months.

Please refer to the following pages for detailed product information.

We appreciate that the volume of this change is substantial, we appreciate your patience and understanding.

Thank you for your continued support, we look forward to this next step in our partnership. If you have any questions, please do not hesitate to contact your account manager or myself.

Kind Regards,

Cara Davern
Country Manager
