NUTRITIONAL MILK FOR ANIMALS

A nutritionally complete milk replacer for infants and comprehensive supplement for animals in stress or requiring additional nutritional support.

WHY SHOULD I GIVE THIS TO MY ANIMAL?

CERTIFIED

Milk Replacer for Infants

Nutritional Milk For Animals is a nutritionally complete milk replacer for infants from birth. Orphaned, early weaned or when mum is unable to feed. It contains 25 vitamins and minerals, all the essential amino acids, and prebiotics all in a low lactose formulation that is gentle on newborn digestive systems. It meets the AAFCO standards for pre-weaned infants and carries the PFIAA certification (AS5812).

NUTRIENT DENSE

For Pre-Natal, Pregnant and Lactating Animals

Ensuring that a pregnant or lactating animal receives optimal nutrition is essential for her health, recovery and the wellbeing of her infants. This easily digested high-quality, nutrient-dense supplement can help support the extreme demands of gestation and lactation while supporting hydration - pre and post birth.

GENTLE AND NOURISHING

For Recovery and Restoration

Animals recovering from illness, surgery or injury may lose their appetite or struggle to eat enough and this is when their bodies need the most nourishment of all. For the very best chance at healing and regaining strength, Nutritional Milk For Animals offers comprehensive, convenient, high-quality and readily absorbed nutrition that supports the nutritional needs of pets and animals during this critical time.
